Mr. Robert D. Calkins  
 President  
 The Brookings Institution  
 722 Jackson Place, N. W.  
 Washington 6, D. C.

Dear Mr. Calkins:

It is very kind of you to ask me to nominate members of the Agency to participate in your forthcoming conference on the subject of "The Executive in Science" to be held in Williamsburg, Virginia, beginning on 30 November 1954.

In this instance, I should like to nominate Dr. Otto K. Guthe, an Assistant Director of the Agency and responsible for directing our economic and geographic intelligence research. Dr. Guthe has had a varied experience in organizing and guiding governmental research in both the physical and social sciences, and I am confident that, if he is selected, he will add constructively to the discussions and, in turn, will benefit from participation. As you directed, Mr. William T. McDonald, Director of the Executive Conference Program, will be provided with a brief resume of Dr. Guthe's background and career record.

We appreciate your consideration in again giving us the opportunity to nominate members of the Agency for participation in this series of conferences for career executives in the Federal Service.

Sincerely,

APPROVED:
